The last step in bereavement care...

Presentation & Handling

The Preshand System™ offers caregivers a dignified and practical approach to Presenting and Handling an infant loss.

The Presentation offers parents a softer, less clinical setting for good-byes in the hospital and helps create a comforting memory and a lasting image of their baby resting peacefully in a baby basket.

At this time, staff or parents may consider taking photos of the baby in the Presentation Basket to preserve this image.

For Handling, in a staff work area, the caregiver makes final preparations for the baby and securely closes the Insert by tying the ribbons. Serving as both a respectful means of storing the baby, and providing the baby’s final resting place, the Preshand Insert is placed inside the Handling Carrier, where transporting to the morgue or pathology throughout any public area in the hospital can now be done with confidence and discretion.

The Preshand System provides the needed tools to complete the last step in bereavement care and considers the dignity and respect for both the baby and the caregiver.

Put your C.O.W. Out to pasture.

Charting, Labs, Internet. At the neonatal monitor.

Whether you call it a W.O.W. or a C.O.W. – you won’t need it any longer. You can stay with baby as you chart, access labs and pharmacy, and check clinical protocols – all at the Spacelabs neonatal monitor. Available in single (as in picture-in-picture) or dual display. Your choice.

Why stand in the hall when you can be outstanding in your field?

Aerogen nebulizers deliver an incredible four times more medication than traditional jet nebulizers, offering you unsurpassed efficiency and allowing you to give your patients the very best care available. They work independently to the ventilator settings meaning there’s no added flow, no nuisance alarms, no loss of PEEP when opened for refill and no drug wastage. Aerogen truly sets a new standard.

Breathe easy.
You’re giving the best care.

Miracles at Birth - Hamilton G5

The Hamilton G5 is designed to offer a choice of ventilation modes for neonatal, pediatric and adult patients requiring invasive or non-invasive ventilation.

With the unique features of Adaptive Support Ventilation (ASV) and the configurable user interface, the new neonatal option expands the G5 patient range down to the tiniest infants and premature babies. The proximal flow sensing provides the precise volume and leak monitoring with accurate, responsive triggering that your smallest patients demand.

Visit Neonatal Intensive Care’s Website

www.nicmag.ca

Neonatal Intensive Care, The Journal of Neonatology-Perinatology, is on the web. Now you can easily access our journal online. For the latest neonatal news, subscription information, article submission info, media kit, and updates on new products, plus our current issue and back issues, see www.nicmag.ca.

NEONATAL INTENSIVE CARE has been providing vital information to neonatal caregivers for two decades. Our readers are healthcare professionals in the fields of neonatology and perinatology, respiratory therapy, fetal medicine and research, neonatal nursing, NICU management, neonatal pharmacology, neonatal pharmacology, and obstetrics and gynecology.

The scope of each issue includes clinical studies, product reviews, diagnostic techniques, modalities of care, facility reports, management issues, product reports, the latest about ethical issues, and relevant case studies. We also feature guest commentaries and works in progress, letters, news, interviews, and any information of interest to neonatology practitioners.

We welcome all electronic submissions, including original papers, works in progress, and guest commentaries, as well product releases, company profiles, and more.

See www.nicmag.ca for more info.

Buyer's Guide 2011

neonatal INTENSIVE CARE
PRODUCTS AND SERVICES

Respondents were asked to select categories that applied to their companies. We used previous information for firms that didn’t return forms. Also, if companies selected inappropriate or duplicate categories, we made a judgment call on the proper categories. Companies that returned forms have a more complete listing of all their product categories in the alphabetical section. Companies are responsible for the accuracy of all information in this directory.

Help Reduce the Risk of SIDS by Modeling Safe Sleep Practices In-Hospital

Are you telling new parents how to reduce the risk of SIDS and then swaddling their newborn with a loose blanket? Your nursery practices could actually be sending the wrong message to parents. The American Academy of Pediatrics suggests the use of a wearable blanket to replace loose blankets in the crib. Designed by Bill Schmid, who lost his first born to SIDS, the HALO® SleepSack® wearable blanket is the #1 trusted choice of hospitals. It’s the perfect solution for modeling safe sleep practices in-hospital and as gifts for new parents.

“The babies love them and the nurses do as well... we wrap the babies in SleepSack Swaddles while they are here, then provide SIDS prevention literature for parents when they are discharged. We think it makes a difference.”
– Cathy Anderson, North Memorial Hospital Newborn Intensive Care Nurse Manager

FREE TRIAL
Request a FREE HALO® SleepSack® wearable blanket and join the more than 400 hospitals that have implemented the HALO® Safer Way to Sleep initiative. Call 888-999-HALO or visit HaloSleep.com/Hospitals

Sometimes, the smaller your organization, the more details matter. That’s why ONY, Inc., our little company in Amherst, New York, produces only Infasurf® (calfactant) – an area we pioneered over 20 years ago.

All our reps are neonatal intensive care professionals. And though we’re not big pharma, we’ve been successful in making a difference for high-risk RDS newborns for over a decade.

Why is our product so different? Infasurf delivers the highest SP-B to phospholipid ratio on the market, resulting in:

• A PROLONGED EFFECT THAT CAN MEAN FEWER DOSES
• RAPID IMPROVEMENT IN VENTILATION
• APPROVAL FOR BOTH PREVENTION AND TREATMENT OF RDS

Mortality rates for all approved surfactants have been shown to be similar. But to us at ONY, the small differences in Infasurf can have a big impact on the tiny infants and their families that you help every day.
Sometimes, the smaller your organization, the more details matter. That’s why ONY, Inc., our little company in Amherst, New York, produces only Infasurf® (calfactant) – an area we pioneered over 20 years ago. All our reps are neonatal intensive care professionals. And though we’re not big pharma, we’ve been successful in making a difference for high-risk RDS newborns for over a decade.

Why is our product so different? Infasurf delivers the highest SP-B to phospholipid ratio on the market, resulting in:

- A prolonged effect that can mean fewer doses
- Rapid improvement in ventilation
- Approval for both prevention and treatment of RDS

Mortality rates for all approved surfactants have been shown to be similar. But to us at ONY, the small differences in Infasurf can have a big impact on the tiny infants and their families that you help every day.
The NTrainer System

A New Innovative Technology to Promote Oral Feeding in Newborns and Infants Born Prematurely
