Use the safer practice to prepare human milk.

Waterless Milk Warmer™

Eliminates contamination risk of warming milk with tap water.

The CDC reports that high risk patients are among those at the greatest risk of infection caused by waterborne microorganisms.¹

Call or email your local Medela Consultant for a demonstration.

The Giraffe® Shuttle

Our latest addition to the family – it provides electrical power to any of the Giraffe beds or Panda¹ warmer, enabling them to be used for transporting sick babies within the same hospital building² – from Labor and Delivery to the NICU and from NICU to other care areas.

The Giraffe Shuttle combined with the bed helps reduce the potential for clinical problems that can result from interrupted patient thermoregulation, patient touch, handling and movement – all of which may challenge physiological stability when moving babies to and from a transport incubator.

Visit us September 14-16, 2011 in Orlando, FL at the GE Healthcare booth #303 at NANN

SERVO-i® with NAVA® for neonates — improving care for your most vulnerable patients.

Patient-ventilator synchrony is vital for small babies where conflict is evidenced in failing gas exchange and severe respiratory asynchrony. SERVO-i with NAVA effectively addresses mechanical ventilation challenges for neonates:

- Allows the baby to rest and save energy to develop and grow
- Decreases airway pressure using neural feedback
- Improves oxygenation and CO₂ washout
- Lowers hypoxia risk with an integrated back-up system
- Provides real-time monitoring of Edi — the respiratory vital sign

With SERVO-i and NAVA, redefine synchrony breath-by-breath for your most vulnerable patients and improve care for those who need it most.

NAVA and SERVO-i are registered trademarks of MAQUET Critical Care AB.
Keep Your Most Vulnerable Patients Safe

Trust Masimo Pulse Oximetry to protect even your tiniest patients, with clinically proven Measure-through-Motion and Low Perfusion technology. The gold standard in SpO2 performance, our technology virtually eliminates false alarms without missing true clinical events.¹

Let Masimo rainbow SET® help you:

- Reduce the incidence of retinopathy of prematurity (ROP) ²
- Monitor for methemoglobinemia and keep cyanotic infants safe ³, ⁴
- Enable more timely and efficient newborn resuscitation ⁵

PRODUCTS AND SERVICES

Respondents were asked to select categories that applied to their companies. We used previous information for firms that didn’t return forms. Also, if companies selected inappropriate or duplicate categories, we made a judgment call on the proper categories. Companies that returned forms have a more complete listing of all their product categories in the alphabetical section. Companies are responsible for the accuracy of all information in this directory.
